

Protecting your health and safety

Notes for visitors and contractors

Unfamiliar areas can be hazardous to visitors who do not follow these instructions.

Visitors may only enter the production area if this has been arranged beforehand and when accompanied by authorised personnel. Employees of contractors and other outside companies may only work independently after receiving special instructions and signing confirmation that the employee has read and understood the "Safety regulations for contractors".

The instructions from the accompanying personnel are to be followed.

Walk only on marked routes! Take special care to keep an eye out for forklifts.

Observe all signs and labels.

Stay away from areas where personal safety gear must be worn or obtain the proper protective gear. This gear must be worn when provided.

Keep a distance from machines and equipment. Do not reach into the machine or equipment. Observe all signs and labels. Machine parts can be hot and have areas that can draw in or crush limbs.

Unauthorised access to the high rack storage areas is strictly prohibited. These areas may only be entered when accompanied by personnel responsible for the warehouse. Entering the hazardous materials storage area is prohibited.

Note that there is no smoking allowed anywhere in the factory. Smoking areas are accordingly indicated.

If something happens in spite of these precautionary measures, then inform the person accompanying you or your contact person immediately and allow them to provide first-aid.

In case of a fire, leave the area immediately and go to the meeting point. However, use of the lift is prohibited in this case. Only leave the company after signing out. We need to know if you have left the hazardous area.

The Stahl management wishes you a safe and comfortable stay on our premises.
